How to save on insurance

- The higher your excess = the lower your premium (and the other way around).
- Want something more suited to your budget? With our affordable theft and write-off car insurance you could save up to 53%!*
- Want more savings and less cover? Change to our cheaper fire and fury home contents insurance to save up to 48%!*
- Remove non-essential cover like car hire.
- Update your policy, check for any old items still listed.
- Changes in things like marital status, address, or car details can affect your premium, so let us know.

*Savings and premiums are risk profile dependent and based on our stats.
